Steve Davis
Federal Sites Management Unit
DLPC, IEPA
Springfield, Illinois

Dear Mr. Davis:

I want to take this opportunity to thank you for your participation in the interdivisional and inter-agency review/comment discussion period in reference to the Sauget Sites (Dead Creek) Study prepared by Ecology & Environment.

The comments prepared by each reviewer will help the agency and our consultant generate a thorough document describing the existing conditions of the twelve individual hazardous waste sites and six sections of Dead Creek in Sauget and Cahokia, Illinois. This document will be used not only as a reference to the very complex geohydrological conditions but more importantly as a scoring tool in which a Hazardous Ranking Score (HRS) can be developed which will hopefully enable the agency to propose these sites to the National Priority List (NPL). If our efforts are successful in obtaining federal funds, this will enable the agency to conduct a detailed Remedial Investigation and Feasibility Study of the area. The sites are presently a serious threat to the environment and public.

In closing, I feel that the meetings between our separate offices and respective professional disciplines strengthens our approach to the problems at Sauget and lines of inter-agency and divisional cooperation.

Again, thank you for your time and professional participation in this endeavor.

Sincerely,

A handwritten signature in black ink, appearing to read "JL", with a long horizontal flourish extending to the right.

Jeff Larson, Project Manager
Federal Site Management Unit
Remedial Project Management Section
Division of Land Pollution Control
